

- CAUTION**
- The communicator should be installed and maintained by qualified personnel.
  - Prior to installation, it is advised to read full device installation manual carefully in order to avoid mistakes that can lead to malfunction or even damage the equipment.
  - Disconnect the power supply before making any electrical connections.
  - Changes, modifications or repairs not authorized by the manufacturer shall void your rights under the warranty.

### Schematics for wiring the communicator to the security control panel

Following the schematics provided below, wire the communicator to the control panel.

## Programming the DSC NEO HS2016 Alarm Panel via LCD Keypad

Using the control panel's keypad enter these sections and set them as described:

### Enable reports for transmission to the CMS and the Protegus app

Keypad Entry	Action Description
*85555	Enter programming mode
001*	Entering "Zone type" programming
066##	Entering the "Momentary keyswitch" zone type
301*	Entering "Phone Number" programming
<1234##	Enter phone number (1234)
310*	Entering "Account Codes"
1111	Enter "System Account Code" (1111)
001	
2222#	Enter "Partition 1 Account Code" (2222)
311	Entering "Partition 1 Call Direction"
003*##	Enable "Partition Opening/Closing Call Direction" (Y)
350*	Entering "Communicator Formats"
03#	03- Contact ID format

### LED indication of communicator operation

Indicator	Light status	Description
NETWORK	Off	No connection to cellular network
	Yellow blinking	Connecting to cellular network
	Green solid with yellow blinking	Communicator is connected to cellular network. Yellow blinks count indicates signal strength, 10 blinks max. Sufficient cellular signal strength for 4G network - level 3 (three yellow flashes).
DATA	Off	No unsent events
	Green solid	Unsent events are stored in buffer
	Green blinking	<b>(Configuration mode)</b> Data is being transferred to/from communicator
POWER	Off	Power supply is off or disconnected
	Green solid	Power supply is on with sufficient voltage
	Yellow solid	Power supply voltage is insufficient ( $\leq 11.5V$ )
	Green solid and yellow blinking	<b>(Configuration mode)</b> Communicator is ready for configuration
	Yellow solid	<b>(Configuration mode)</b> No connection with computer
TROUBLE	Off	No operation problems
	1 red blink	SIM card not found
	2 red blinks	SIM card PIN code problem (incorrect PIN code)
	3 red blinks	Programming problem (No APN)
	4 red blinks	Registration to GSM network problem
	5 red blinks	Registration to GPRS/UMTS network problem
	6 red blinks	No connection with the receiver
	7 red blinks	Lost connection with control panel
	8 red blinks	The entered ICCID number does not match the ICCID number of the SIM card
	Red blinking	<b>(Configuration mode)</b> Memory fault
	Red solid	<b>(Configuration mode)</b> Firmware is corrupted
BAND	1 green blink	None
	2 green blinks	GSM
	3 green blinks	GPRS
	4 green blinks	EDGE
	5 green blinks	HSDPA, HSUPA, HSPA+, WCDMA
	6 green blinks	LTE TDD, LTE FDD

## Setting up the GT+ communicator with the app

Download and launch the Protegus application or use the browser version: [web.protegus.app](http://web.protegus.app). The installer must connect to Protegus with an installer account.

**Step 1**

Click the "Add new system" button

**Step 2**

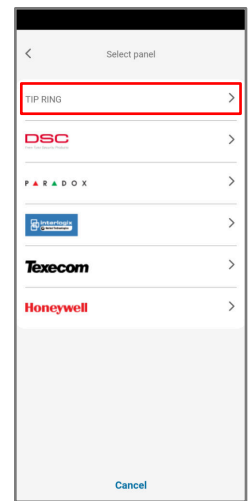

Enter the IMEI number of the communicator

**Step 3**

Select security company

**Step 4**

Press "TIP/RING"

**Step 5**

Press "Mode"

**Step 6**

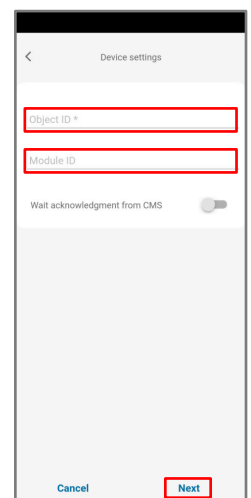

Select "AUTO"

**Step 7**

Press "Next"

**Step 8**

Enter "Object ID" and "Module ID". Press "NEXT"

### Setting up the GT+ communicator with the app

**Step 9**

Wait while the configuration is written

**Step 10**

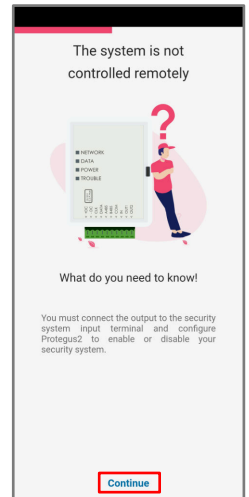

Press "Add to Protegus2"

**Step 11**

Enter system "Name". Press "Next"

**Step 12**

Press "Continue"

**Step 13**

Enter "Area name". Enable "Control with Protegus2"

**Step 14**

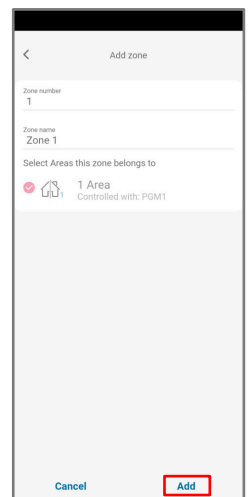

Select PGM Output. Press "Save"

**Step 15**

Press "Next"

**Step 16**

Press "Add"

### Setting up the GT+ communicator with the app

**Step 17**

Press "Done"

**Step 18**

Press "Finish"

**Step 19**

Press on system

**Step 20**

Wait 1 minute and press "Transfer"

**Step 21**

Enter the e-mail of the user to whom the installer will transfer the system. Press "Transfer"

**Step 22**

The system will appear in Protegus on the user's phone

After completing the setup and installation perform a system check:

1. Create an event:
  - by arming/disarming the system with the control panel's keypad;
  - by triggering a zone alarm when the security system is armed.
2. Make sure that the event arrives to the CMS (Central Monitoring Station) and the Protegus app.
