

# Device registration

## Unassigned devices

# What is device registration for?

- Allows to assign offline device to your company.
- Ensures that your device belongs to your company and no other company can re-register or add system to Protegus.
- Allows device configuration before device control is handed to end-user.

# How to register?

- By adding a system to Protegus
- By using a registration function

## Setup device

Set up device to work with monitoring station

## Register device

Add an offline device

# Permission

Device registration is dependent on permission rule "Unassigned devices"

"**view**" permission determines if "Company admin" can see registered devices which are "Inactive".

"**add**" permission allows "Company admin" to access device registration function.

"**edit**" permission allows "Company admin" to edit basic information of the already registered device.

"**delete**" permission allows "Company admin" to unregister the device.

# Permission

No matter what permissions are set, device will always be automatically registered when any user adds a system to Protegus

- If “Company admin” adds a system, device will be assigned to their company.
- If “Installer” adds a system, device will be assigned to their company.
- If “General user” (end-user) adds a system, device will be registered without company assigned. Such device can later be reassigned to a company.

# Registration

As a company, open "Systems" window:

The screenshot shows the Protequs web application interface. At the top, there is a navigation bar with the Protequs logo and the URL 'WEB.PROTEGUS.APP'. The navigation menu includes 'Systems', 'Events', 'Users', 'Permission rules', 'Tags', 'Settings', and 'Help'. The 'Systems' menu item is highlighted with a red underline. On the right side of the navigation bar, the user is identified as 'Hi, Trikdís Company 1' with a 'COMPANY ADMIN' role and a 'Log out' button. Below the navigation bar, the 'Systems' window is displayed. It features a search bar with the text 'Search...'. To the right of the search bar are two buttons: '+ Add' and 'Modify columns'. Below these elements is a table with the following columns: Name, Account no., Device, Unique ID/IMEI, Installer, Owner, Company name, Online, Address, and Tags.

# Registration

Click "Add" on the right side of the systems table and then "Register device"

The screenshot shows the Protegius web interface. At the top, there is a navigation bar with the Protegius logo and several menu items: Systems, Events, Users, Permission rules, Tags, Settings, and Help. On the right side of the navigation bar, it says "Hi, Trikidis Company 1" with a user profile icon and a "Log out" button. Below the navigation bar, there is a "Systems" section with a search bar. A table with columns for Name, Account no., Device, Unique ID/IMEI, Installer, Owner, Company name, Online, and Address is visible. To the right of the table, there are two buttons: "Add" (with a plus icon) and "Modify columns" (with a grid icon). A dropdown menu is open from the "Add" button, showing two options: "Setup device" (with a sub-description "Set up device to work with monitoring station") and "Register device" (with a sub-description "Add an offline device"). A red arrow points to the "Register device" option.

# Registration

If you want to register single device, enter unique ID (IMEI or MAC) of the device (can be found on a sticker on a box) and click "Regsiter"

**Device registration disclaimer**

We'll automatically clean duplicate instances of the device's Unique IDs.

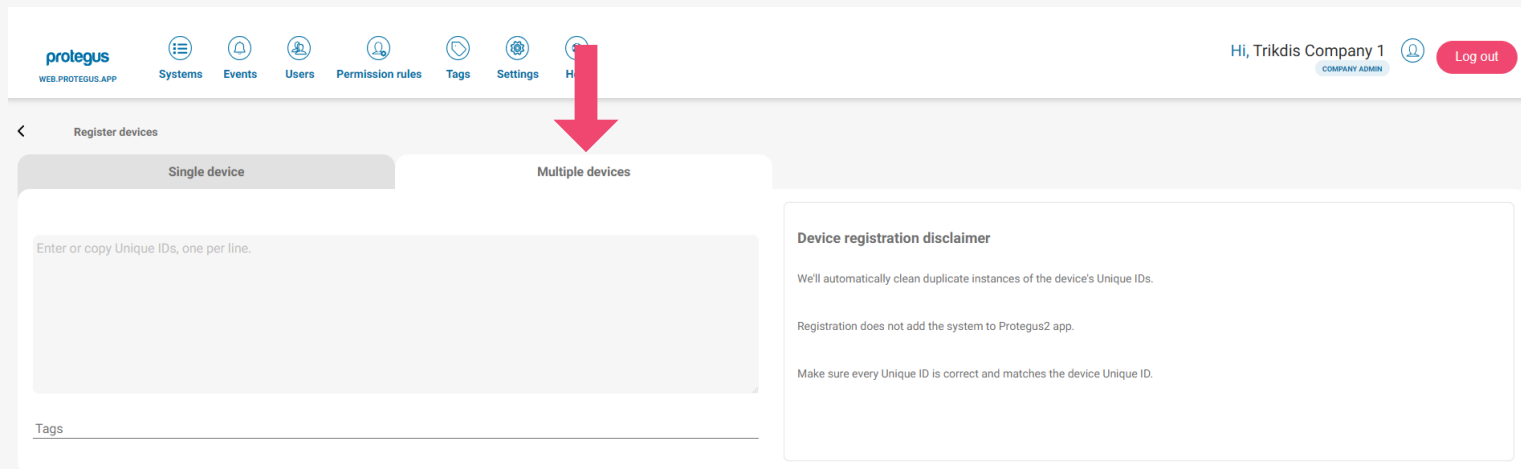

Registration does not add the system to Protegus2 app.

Make sure every Unique ID is correct and matches the device Unique ID.

# Registration

You may also register multiple devices. Click on "Multiple devices" tab.

# Registration

Paste the unique ID list from another spreadsheet or type IDs by hand. Each unique ID must be placed on a new line.

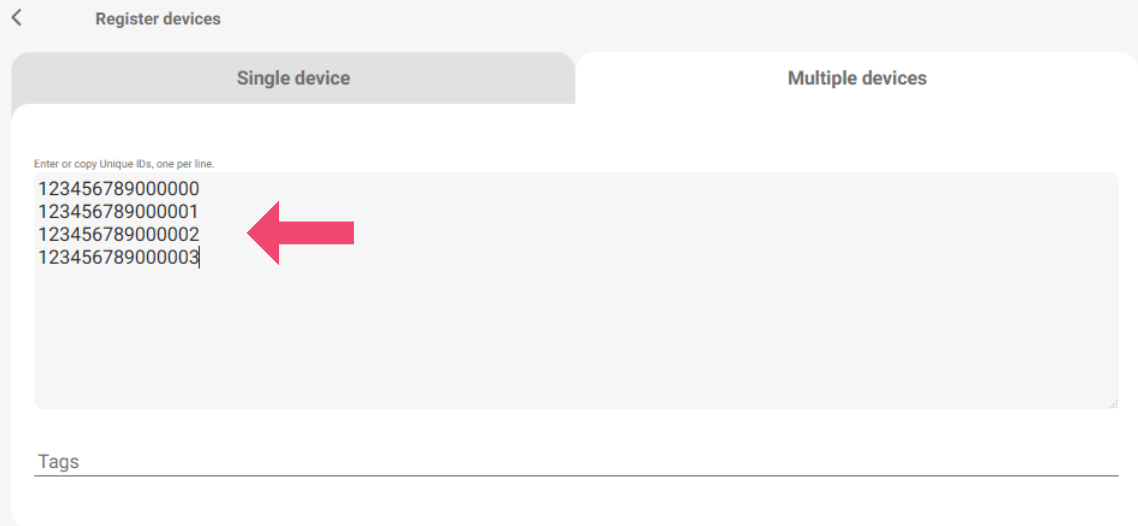

< Register devices

Single device Multiple devices

Enter or copy Unique IDs, one per line.

# Registration

Click "Register" and you will be presented with the summary.

The screenshot shows the 'Register devices' summary screen in the Protequs application. The interface includes a top navigation bar with the Protequs logo and menu items (Systems, Events, Users, Permission rules, Tags, Settings, Help). The user is identified as 'Hi, Trikdís Company 1' with a 'COMPANY ADMIN' role and a 'Log out' button. The main content area is titled 'Register devices' and has two tabs: 'Single device' (selected) and 'Multiple devices'. A green progress bar indicates 'Register finished'. Below this, a 'Registered' section contains a table with four rows of Unique ID/IMEI values: 123456789000000, 123456789000001, 123456789000002, and 123456789000003. To the right, a summary of registration results is shown in five boxes: 'Registered to another company' (0), 'Invalid Unique IDs' (0), 'Duplicates' (0), 'Already registered' (0), and 'Registered' (4). At the bottom right, there are 'Finish' and 'Register more' buttons.

Unique ID/IMEI
123456789000000
123456789000001
123456789000002
123456789000003

Registered to another company: 0

Invalid Unique IDs: 0

Duplicates: 0

Already registered: 0

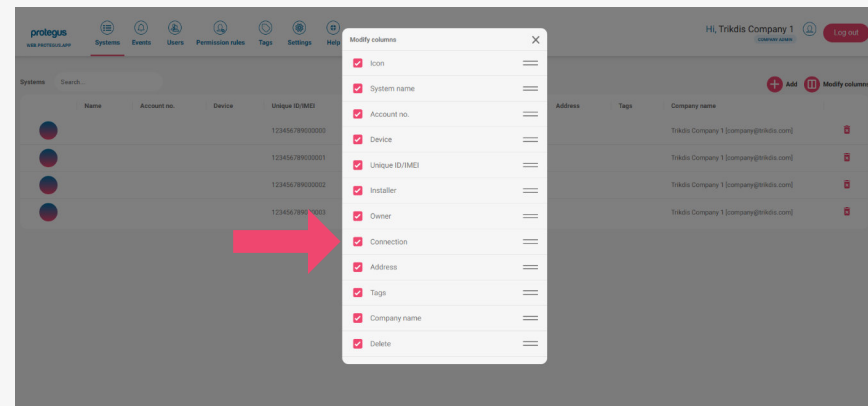

Registered: 4

# Registration

Once done, click "Finish" to return to "Systems" window and your newly registered devices will appear in the list.

Name	Account no.	Device	Unique ID/IMEI	Installer	Owner	Connection	Address	Tags	Company name
			12345678900000	None		Inactive ●			Trikdis Company 1 [company@trikdis.com]
			12345678900001	None		Inactive ●			Trikdis Company 1 [company@trikdis.com]
			12345678900002	None		Inactive ●			Trikdis Company 1 [company@trikdis.com]
			12345678900003	None		Inactive ●			Trikdis Company 1 [company@trikdis.com]

If you don't see a column "Connection", modify the columns and check the box labeled "Connection".

# Registration

- Registered devices have no name or owner assigned but they belong to a company.
- Device settings can be accessed and changed once it has been connected.
